

Project Description: NA10NMF4740349

The goal of this multi-faceted project is to enhance state cooperation, management and analysis of fisheries data and to support ASMFC FMPs. Funds will be dedicated to three specific projects: an update of the blue crab assessment and the risk/uncertainty analysis in addition to commercial catch sampling, a continuation of law enforcement to support the implementation of FMPs, and a continuation of support to the FMP for horseshoe crabs.
