

Project Description: NA10NMF4070395

The objective of this project is to work with statistical and modeling experts at the Quantitative Fisheries Center (QFC) at Michigan State University (MSU) to provide a research, outreach/service, and teaching program to 1) build greater capacity within fishery management agencies in quantitative methods, 2) improve quantitative methods for assessing fish stocks, 3) assist agencies in the use of model-based approaches in decision making, and 4) develop a better understanding of fish community and population dynamics.
