

Project Description: NA10NMF4740290

The project proposes to continue the long-term alosines bio-monitoring effort on the Susquehanna River by addressing 5 objectives: (1) Lower Susquehanna River haul seining for juvenile alosines; (2) mid-river haul seining for juvenile alosines; (3) Conowingo Dam west fish lift operation for the collection of adult alosines; (4) American shad otolith analysis; and (5) contract administration and project oversight.
